

# 25-39 year-olds with educational qualifications

Graphic: REFUGEES.DK. Source: A specific dataset from Denmark Statistics (Population and Education) October 2019. The survey is based on both Danish and foreign education and includes both immigrants and descendants from the different countries of origin. The table shows the percentage of those who have completed a qualifying education in the age group, i.e. vocational education, short tertiary education, medium tertiary education, bachelor's degree, long tertiary education and PhD. and research training.
